

PGM GEAR OIL EP

EXTREME PRESSURE GEAR OILS

ISOVG 100 150,220,320,460 & 680

PGM Gear Oil EP series are a group of premium quality industrial gear lubricants specifically developed for enclosed gear boxes operating under moderate to severe service conditions. These oils are manufactured from high quality mineral base oils, containing sulphur-phosphorus extreme pressure additives that provide high load carrying properties and protection against wear. The additive package incorporated in this product offers good protection against corrosion of steel and copper containing alloys. **PGM Gear Oil**

EP offers good demulsibility characteristic plus prevents build-up of foam in the oil reservoirs.

PGM Gear Oil EP series are recommended for industrial enclosed gear boxes where ever industrial EP gear oil is recommended, particularly for gear sets operating under heavy loads.

The product meets the requirements of: US Steel Specification No 244 for enclosed gear lubricants, AGMA Specification 9005- E02 (Replaces 250.04), DIN 51517, part 3 specifications.

- Excellent load carrying capabilities
- Good oxidation stability
- Protects against corrosion and rusting

PGM GEAR OIL EP

Product	ISO VG Grades	Viscosity cSt. @40o C	VI	Flash Point COC oC	Pour Point oC
Gear Oil EP 68	68	68	97	210	-3
Gear Oil EP 100	100	100	97	230	-3
Gear Oil EP 150	150	150	97	242	-3
Gear Oil EP 220	220	220	96	250	-3
Gear Oil EP 320	320	320	96	260	-3
Gear Oil EP 460	460	460	98	268	-3
Gear Oil EP 680	680	680	74	280	-3
